100 YEARS 

EXTERIOR WALK-AROUND. FRONT END.

The **kidney grille** is wider at the bottom than at the top, giving the car a broader, distinctive and sportier appearance. It is the first time that this design detail made its debut on a modern BMW.

The **full LED headlights** feature three-dimensional hexagonal tubes for the daytime running lights, with the LED fog lights as a standard feature.

The front bumper is dominated by a large hexagonal element situated below the kidney grille, finished in the signature colour of **Frozen Grey**, unique only to the **M Sport X** package.

The squared off wheel arches and lower body claddings are finished in **Frozen Grey**, with the rocker panel featuring hexagonal design elements finished in body colour.

EXTERIOR WALK-AROUND. REAR END.

The BMW roundel features prominently on the C pillar, paying homage to classic BMW coupés such as the 2000 CS and 3.0 CSL.

The **LED taillights** feature a prominent LED light band which emphasises the car's wide stance on the road, while creating a striking appearance at night.

The presence of two large **90 millimetre** tailpipes emphasises the width of the car when viewed from the rear. The lower part of the rear bumper is finished in contrasting **Frozen Grey**.

Automatic Tailgate – With the key fob in the pocket, swinging your foot underneath the rear bumper automatically opens or closes the tailgate for hands-free convenience.

With the **M Sport X** package, the car has a poised on-road stance with the 19" wheels, featuring a striking wheel rim design. As a standout feature in its segment, 20" wheels are available as an option.

INTERIOR TOUCH AND FEEL.

Available for the first time with the M Sport X package, the new trim **“Aluminium Hexagon Anthracite”** features prominently on the dashboard and interior door panels.

The **lights package** features ambient lightning which emphasises the interior's dynamic overall appearance.

Access the iDrive system to select from a range of **six colours** (white, blue, orange, lilac, mint and bronze).

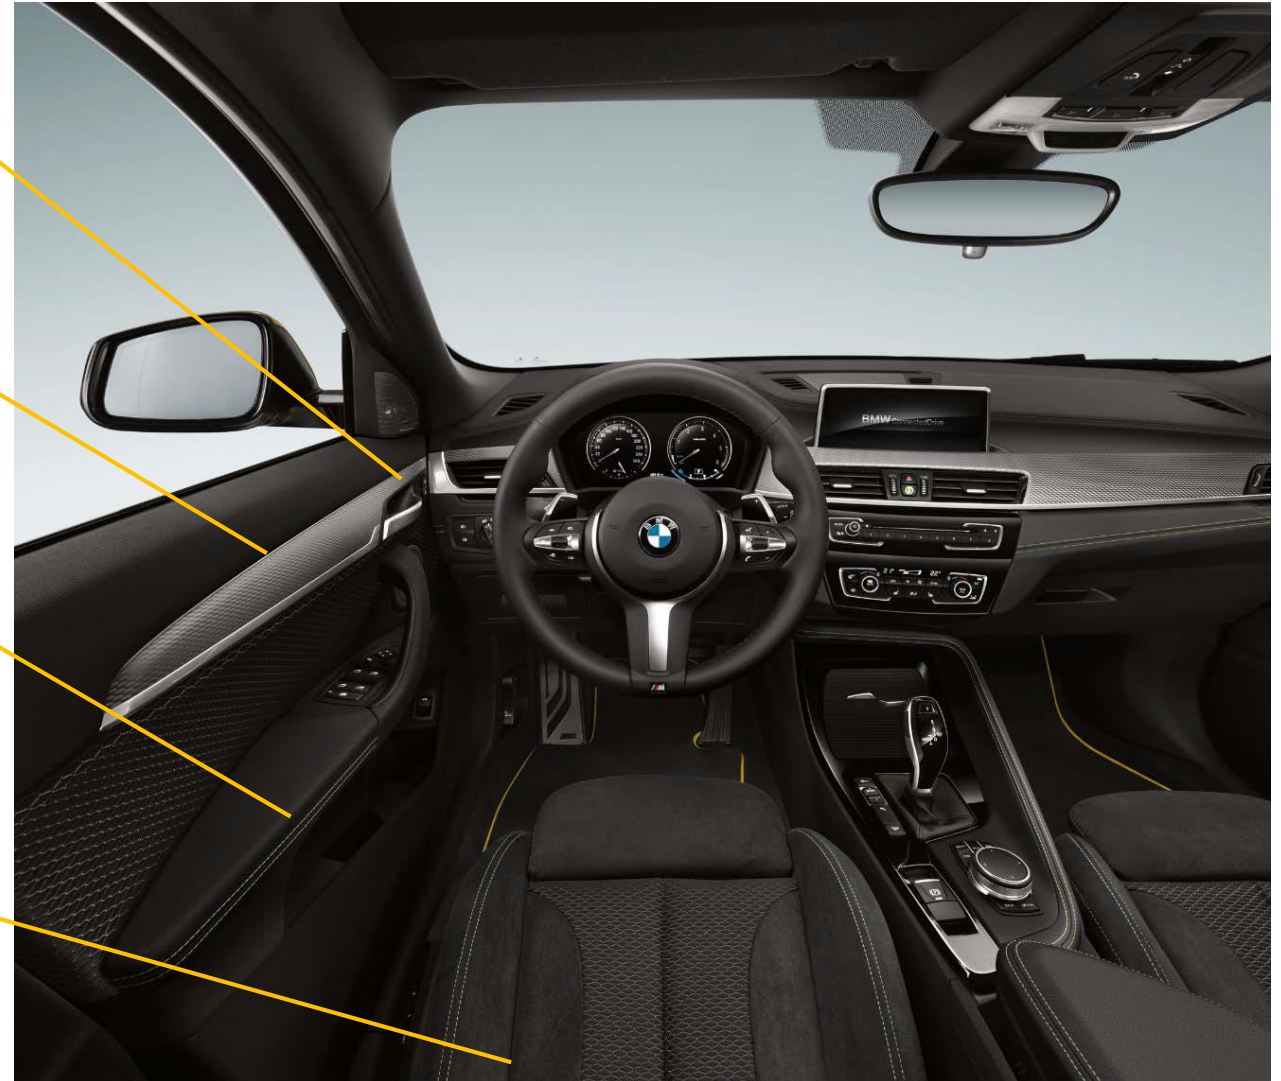

The cabin features **contrasting seams**, which uplifts the high quality feel of the interior.

With the standard sport seats, the new upholstery **Cloth “Micro Hexagon” / Alcantara Anthracite** creates a sporty interior ambience.

This upholstery is available with a choice of yellow or blue contrast stitching.

DRIVING EXPERIENCE.

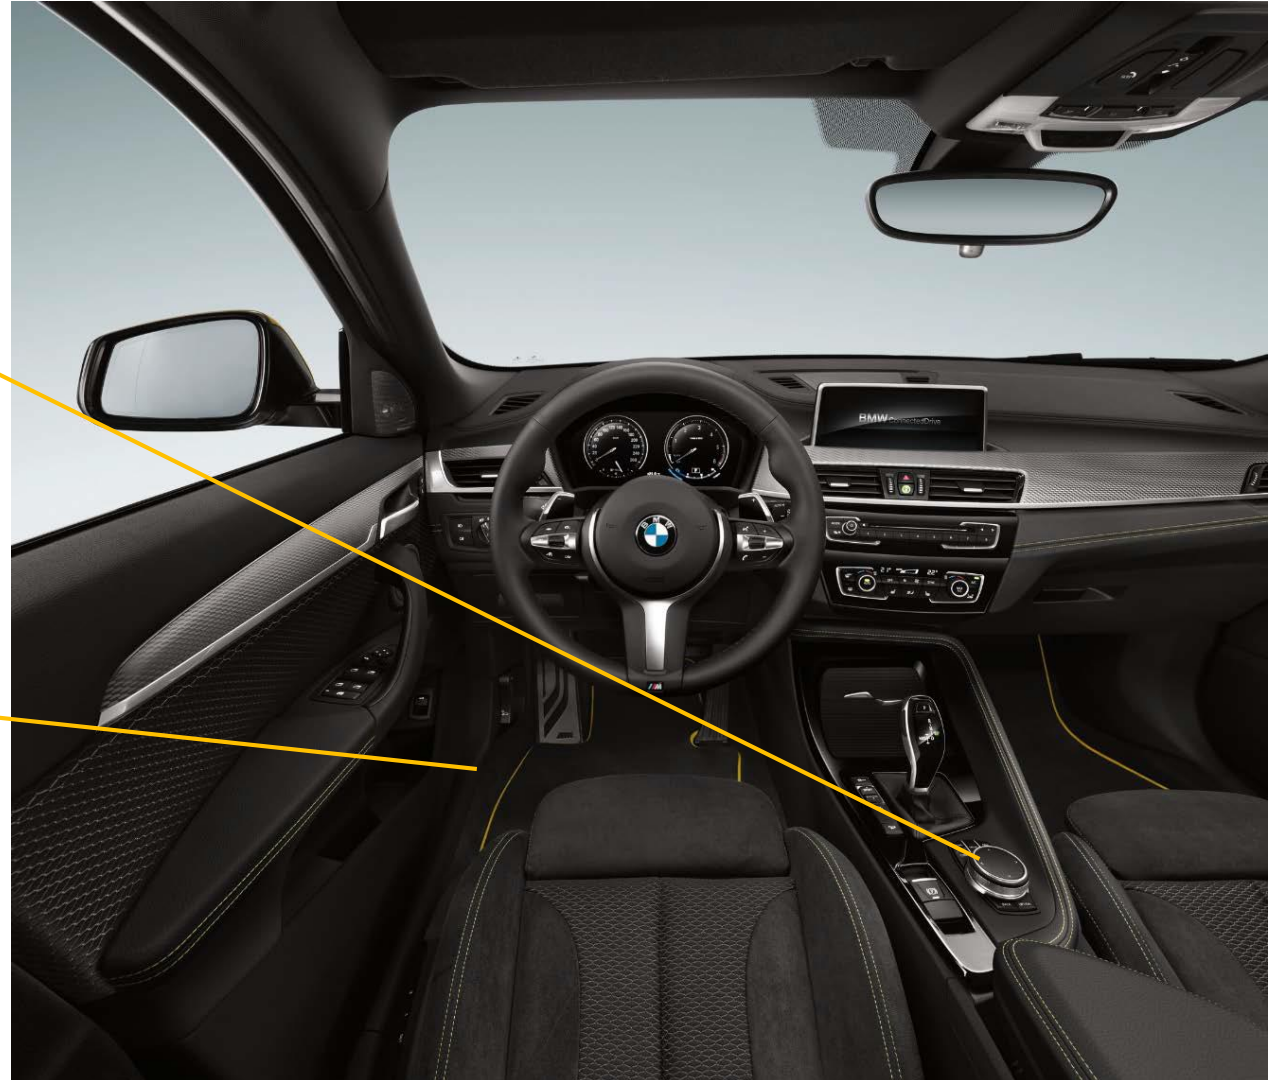

Driving Modes

Start in the default Comfort mode, before switching to Eco Pro and Sport modes for different driving experiences.

M Sport Suspension

Experience enhanced driving dynamics with the M Sport suspension that features stiffened springs and dampers, along with a 10mm lower ride height than standard, which lowers the car's centre of gravity, improves agility and reduces body roll.

KEY FEATURES.

BMW Connected App and Navigation

- Choose a destination via the BMW Connected App.
- After connecting through Bluetooth, the navigation route will be transmitted to the car instantly.
- A message will appear on the touchscreen display requesting for you to accept the destination.
- **Share Live Trip** - Share current position and ETA with selected contact. Contact can view live position with updated ETA.

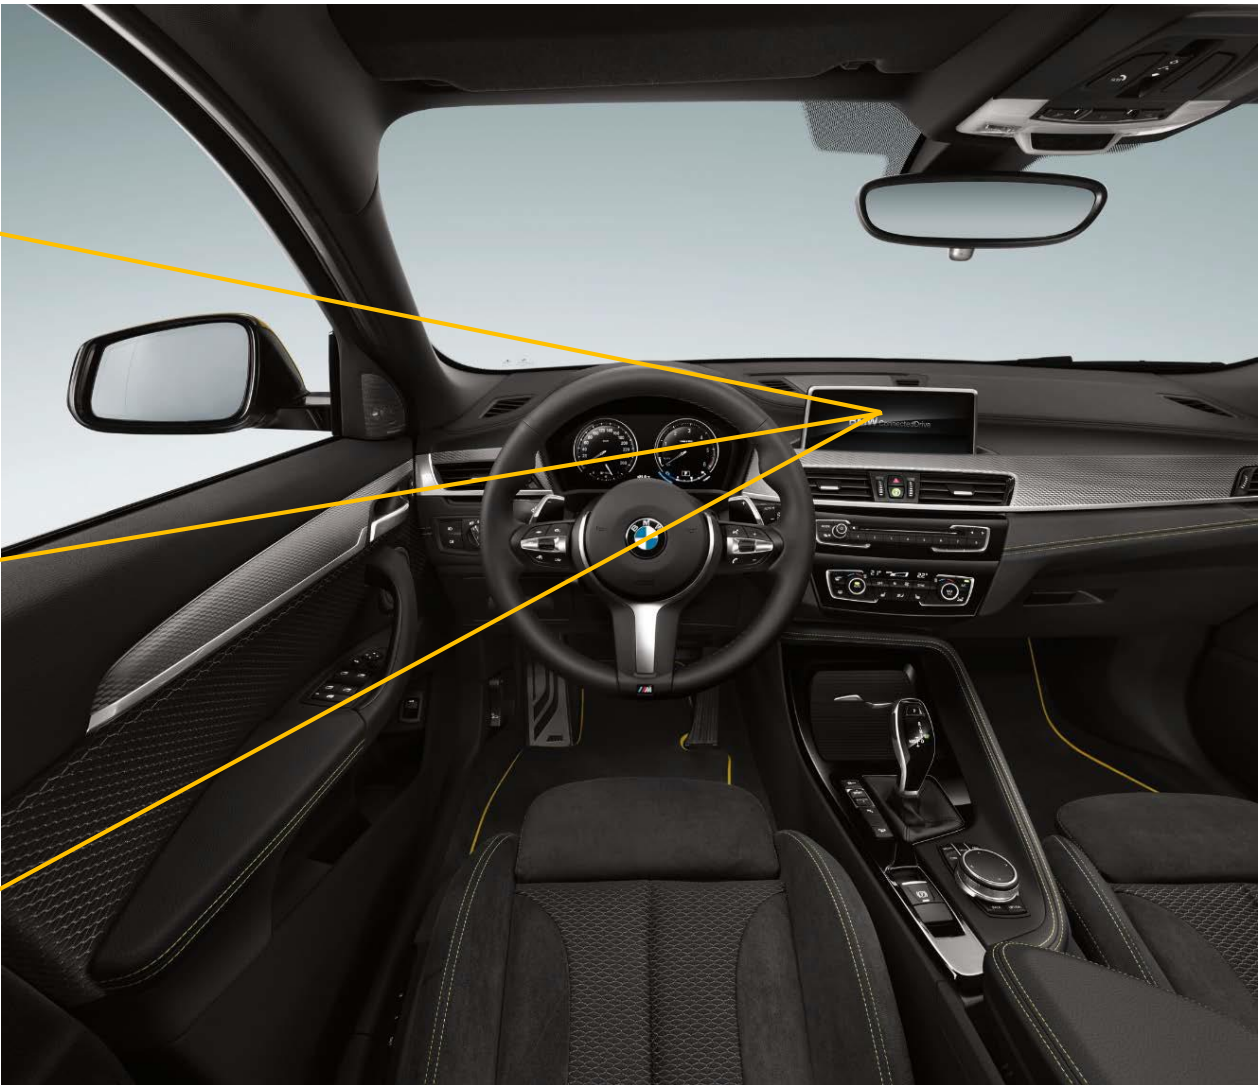

Touchscreen Technology

- Use the 6.5" touchscreen display with standard Navigation to access the various functions of the latest iDrive system.
- It is also possible to view the planned route intuitively via the touchscreen.
- A larger 8.5" touchscreen display with Navigation and BMW Head-Up Display is available optionally.

Parking Assistant

- Activate the Parking Assistant to make parallel parking easier. When a parking space has been found, switch on the turn indicator and the Parking Assistant will control the steering automatically, while you continue to operate the accelerator, brake and gear selection.
- The system provides instructions on the touchscreen display with additional acoustic signals.

THANK YOU FOR YOUR ATTENTION.
